EDUCATION

McMaster University

B.S. in Computer Science

Hamilton, Ontario

Expected Graduation, May 2030

- o Year: Year 1

- o GPA: 3.94

- o Related Coursework: Computational Thinking, Intro to Comp. Programming (Python), Linear Algebra, Calc 1

WORK/VOLUNTEER EXPERIENCE

Workshop 12

Automotive Electronics Accessory Technician

Mississauga, Ontario

Sep 2023 – Jan 2024

- Assembled and soldered electronic harnesses, repaired 15+ tablet companions, and maintained/calibrated 3D printers to support production workflow.
- Produced and managed social media content generating 50K+ views to support marketing efforts.
- Handled fulfillment operations including packaging, shipping, and return logging for 60+ orders.

MAC-MURT

Software Sub-team

Mississauga, Ontario

Nov 2025 – Present

- Researched and evaluated computer vision pipelines for underwater object detection, contributing technical recommendations for navigation and perception strategy.
- Collaborated with cross-functional robotics team members to design and integrate vision system components for an ROV platform.

Weavf

Founder and Full-stack Engineer

Mississauga, Ontario

December 2025 – Present

- Designing and developing an AI-powered web platform using Next.js (App Router), Tailwind CSS, and modern frontend architecture to support teacher workflows.
- Implementing foundational platform features such as user authentication, dashboard layouts, and AI-assisted grading workflows.
- Translated Figma prototypes into responsive production UI while iterating on UX and debugging frontend performance issues.

PROJECTS

Multiplayer Trivia Web Game Full Stack

- Developed a real-time, browser-based multiplayer trivia game with a React + TypeScript frontend and a Node.js + Express backend. Implemented room-based lobbies, player joining via mobile devices, and WebSocket communication for live game updates and interactions across multiple screens.

Clash Royale Bot Machine Learning / OpenCV

- Built a real-time computer vision pipeline using YOLOv8, OpenCV, and MSS for screen capture to detect and classify Clash Royale cards from live gameplay, including a custom-trained YOLOv8 model on my own labeled dataset. Integrated Python-based event logic for elixir tracking, card-cycle timing, and opponent deck prediction.

Personal Portfolio

- Using React.js and Tailwind CSS, I created an attractive portfolio, implementing modern design and UI, while making UX enjoyable.

ACTIVITIES AND LEADERSHIP

Game Development Club JFSS

Founder

Mississauga, Ontario

June 2024 – June 2025

- Developed and taught 15+ members of the club to make a simple car driving game in Unity.

Project Luminosity, Teen Talk

Marketing Executive

Mississauga, Ontario

October 2024- June 2025

- Developed and published engaging content to showcase projects and attract more members to the clubs.

SKILLS

Programming: JavaScript, Python, HTML, Haskell, Typescript, React, Tailwind CSS

Tools: Expo Go, VS Code, IDLE (Python), Unity engine, p5.js editor, OpenProcessing, GitHub, YOLO, Blender (3D Modelling)
